About me

I'm a college dropout of my bachelor of Chemical Engineering. I approved 3 years with special distinctions for my GPA and proposals of being a tutor for engineering subjects due to my skills.

I decided to quit college when I realized that I loved coding. After this, I dedicated myself to study fulltime web and software development.

I have worked as Quality Assurance and Fullstack Developer for world class observatories such as the ESO, IAU and NoirLab, as for a medical software company, using both Spanish and English communication.

Languages

Spanish

Native

English

C2 Proficient (EF SET)

Skills

HTML5, CSS3, Javascript ES6+, Node-Express, React, API REST, Python, Django, Insomnia, MongoDB, Mongoose, SQL Server, MySQL, PostgreSQL, Docker, Sequelize, Sonarqube, Experience with agile methodologies, Mantis Bug Tracker, Git and Github.
