Profile

I'm a college dropout from Universidad Industrial de Santander. I completed 3 years (6 semesters) of chemical engineering, got approved every subject of the curriculum until there. I had a GPA of 4.25/5. My highest semester GPA was 4.54, got a distinction and a 25% scholarship for that. I realized that I love coding. I decided to dropout university and dedicate myself to study fulltime web development, focusing on backend with node and express.

Languages

Spanish
Native

English
B2 (Cambridge test)

Skills

Javascript ES6+, NPM, Insomnia, Node-Express, Git and Github, Python, Django, HTML, CSS, MongoDB, Mongoose, MySQL, PostgreSQL, Docker, Sequelize

Projects
